

Drive Growth While Keeping Friction and Fraud at Bay

Increase conversion - but not risk - with Live Machine Learning

Your business operates in real time – you need a fraud solution that does, too. Sift Science is the only solution powered by Live Machine Learning, allowing us to accurately detect new fraud threats as they emerge.

The Sift Science Trust Platform scales as your business grows, allowing you to automate fraud prevention, reduce operational costs, and deliver frictionless customer experiences.

Our global customer network of fraud data feeds into your machine learning model, so Sift Science can detect fraud immediately – even in new markets. Integration is easy and we learn quickly.

See why leading on-demand companies like Yelp, Cabify, and DoorDash use us to support their business.

John Page
Merchant Processing
Director

“Sift eliminated our worries about where we were selling. We were thinking about restricting certain territories because of the level of fraud seen there, but with Sift, we’ve been able to sign over thousands of new accounts.”

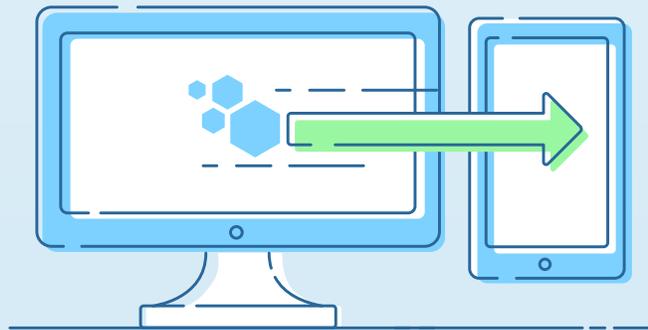

Automate with confidence so you can focus on growth

Learn new fraud patterns in real time	We are the only company to offer true real-time learning, updating our risk assessments every time a user takes action on your site or app.
Grow your top-line revenue	Trust your good customers, and create frictionless experiences that leave them happier and more likely to come back.
Keep operational costs down	Our solution scales with your business, and our console makes automation and manual review more efficient.
Mobile ready	Easy-to-integrate SDKs allow you to capture data from your customers across devices.

Use one platform to stop multiple types of fraud across mobile and desktop

Example signals

- Delivery method and location
- Account age
- Promo code
- Users per mobile device
- Number of reviews
- Minutes until service
- Order message
- Pickup latitude and longitude
- Successful ride count
