

Modernize your fight against fraud

Use Sift Science's Live Machine Learning to stop losses and streamline fraud management

Fighting fraud doesn't have to be hard or a drain on resources. The Sift Science Trust Platform allows you to automate fraud prevention, reduce operational costs, and deliver frictionless customer experiences.

Our global customer network of fraud data feeds into your machine learning model, so Sift Science can detect fraud immediately – even as you grow into new events, markets, or regions.

Irregular spikes in ticket sales, driven largely by major regional events, demand a fraud solution that constantly learns and protects you in those moments.

Mandi Grimm,
Director of Training

“Proactively reducing potential fraud for our client venues is something we take very seriously. With Sift Science, we’ve gained a better understanding of where our charge-backs are coming from.”

Sift Science protects your site when you need it most

Eliminate the need for large, complex rules systems	Let our global and custom machine learning models protect your business, so you don't have to think of every possible threat.
Learn new fraud patterns in real time	We are the only company to offer true real-time learning, updating our risk assessments every time a user takes action on your site across any device.
Maintain constant protection even with sudden spikes in activity	Our adaptable and scalable platform will handle all levels of activity and continue to protect you when your business needs it most... right up to gameday.
Grow your top-line revenue	Trust your good customers, and create frictionless experiences that leave them happier and more likely to come back.
Keep operational costs down	Our solution scales with your business, and our console makes automation and manual review more efficient.
Sell in new channels and venues	Utilize our global customer network to spot new types of fraud even if you haven't seen them before.

Dynamically protect your business across mobile and desktop

Example signals

- Ticket price
- Distance to venue
- Time until event
- Account age
- Number of payment methods
- Promo code
- Type of mobile device
- Time on site

Over \$600,000 in monthly savings from reduced fraud

75% reduction in manual reviews

60x ROI for some of our customers
